## EDUCATION

**Department of Computer Science and Eng., The Ohio State University**

**Ph.D. candidate in Computer Engineering**

Fall 2013 – Present

Perception and Neurodynamics Laboratory (PNL)

Supervisor: Professor DeLiang Wang

**School of Electrical and Computer Engineering, University of Tehran**

**B.Sc. in Computer Engineering**

Fall 2008 – Spring 2013

## RESEARCH INTERESTS

Monaural Speech Enhancement

Speech Dereverberation

Microphone Array Speech Processing

Automatic Speech Recognition

Deep Learning

Statistical Machine Learning

## COMPUTER SKILLS

- *Programming languages*: expert in C/C++, MATLAB, and Python and proficient in Java and Unix shell script.
- *Machine learning toolboxes*: expert in Tensorflow and familiar with HTK, Keras, and PyTorch.
- *Other skills*: experienced in Git and LaTeX.

## RESEARCH EXPERIENCE

*Graduate Research:*

- Studied features for two-talker speech separation in reverberant conditions:
  - Utilized parallel computation and GPU servers on the Ohio Supercomputing Center clusters and performed large-scale DNN training.
  - Derived novel feature combinations based on feature selection methods.
- Designed and implemented a two-talker separation algorithm:
  - Employed a development set to optimize the performance of the DNN by studying regularization methods and network architectures.
  - Collaborated with the Speech Psychoacoustics Laboratory in the Department of Speech and Hearing Science to perform speech intelligibility tests with human listeners.
  - Performed statistical analysis of the test results and reported substantial intelligibility improvement for hearing-impaired listeners.
- Designed and implemented a two-stage bidirectional LSTM to perform joint dereverberation and speech separation.
- Investigated two-talker speaker identification in reverberant mixtures.
- Studied microphone array methods for dereverberation of simulated and recorded reverberant speech signals.
- Collaborated with lab members to study open-set speaker separation methods:
  - Successfully implemented deep clustering, deep attractor network, and permutation invariant training algorithms.
  - Utilized distributed computation over a grid of nodes and GPU servers to perform data parallelism in Tensorflow.
  - Studied the generalization of the above algorithms to reverberant conditions.
- Performed pitch-tracking and speech segmentation based on the techniques in Computational Auditory Scene Analysis (CASA) using Java.

---

- Evaluated the effects of combining visual question answering (VQA) algorithms with object detection and image segmentation (class project).
- Studied transfer learning in the reinforcement learning framework (ongoing class project).

*Undergraduate research:*

- (B.Sc. Thesis) Designed and implemented a decision tree to classify learning styles of toddlers, using the ECLS-K dataset provided by the U.S. Department of Education (Supervisor: Dr. Maryam S. Mirian).
- Proposed a knowledge-based approach for the disaster management process.

## PROFESSIONAL EXPERIENCE

- Reviewer:*
- IEEE/ACM Transactions on Audio, Speech, and Language Processing
  - Speech Communication
- Graduate Teaching Assistant, The Ohio State University:*
- Modeling and Problem Solving with Spreadsheets and Databases Spring 2017
  - Modeling and Problem Solving with Spreadsheets and Databases Spring 2014
  - Foundations I: Discrete Structures Fall 2013
- Undergraduate Teaching Assistant, University of Tehran:*
- Design and Analysis of Algorithms Spring 2012
  - Discrete Mathematics Spring 2012
  - Artificial Intelligence Fall 2011

## PUBLICATIONS AND PRESENTATIONS

- Journal papers:*
- Eric W. Healy, **Masood Delfarah**, Jordan L. Vasko, Brittney L. Carter, and DeLiang Wang, “An algorithm to increase intelligibility for hearing-impaired listeners in the presence of a competing talker” *The Journal of the Acoustical Society of America*, vol. 141, pp. 4230–4239, 2017.
  - **Masood Delfarah** and DeLiang Wang, “Features for masking-based monaural speech separation in reverberant conditions” *IEEE/ACM Transactions on Audio, Speech, and Language Processing*, vol. 25, pp. 1085–1094, 2017.
  - Maryam S. Mirian, **Masood Delfarah**, and Behzad Moshiri, “Proposing a Unified Knowledge and Experience-based System using Information Fusion Approach to Facilitate the Disaster Management Process” *Disaster Management Knowledge Quarterly* (in Persian), vol. 2, pp. 215–227, 2012.
- Conference papers:*
- **Masood Delfarah** and DeLiang Wang, “A feature study for masking-based reverberant speech separation” *Proceedings of INTERSPEECH-16*, pp. 555–559, 2016.
- Selected poster presentations:*
- Eric W. Healy, **Masood Delfarah**, Jordan L. Vasko, and Brittney L. Carter, and DeLiang Wang, “Can a trained deep neural network be implemented into hearing technology?” *Acoustics '17 Boston*, 2017.
  - Eric W. Healy, **Masood Delfarah**, Jordan L. Vasko, Brittney L. Carter, and DeLiang Wang, “An algorithm to increase intelligibility for hearing-impaired listeners in the presence of a competing talker” *Acoustics '17 Boston*, 2017.
